## TJM about us

Back in the 70's when 4WD's were few and far between, three adventure seeking mates got their 'off road thrill' with customised FJ40s, F100s & Rovers. Each fitted with custom made bull bars, roll bars and sand tyres – they drew the attention of friends and bystanders. Before long, Lloyd Taylor, Cliff Jones and Steve Mollenhauer were making hand-made custom bars for a growing number of fans. As the demand continued to grow, they decided it was time to get serious.

In 1973, with little more than their combined initials, shared passion and appreciation for quality products - TJM was founded and the rest is history. They were pioneers and TJM became the first company in Australia to manufacture and distribute quality 4WD equipment.

Our product range has extensively grown to include; steel and alloy bull bars, nudge bars, side and rear protection bars, side steps, trade racks, roof racks, TJM recovery equipment, TJM winches, TJM XGS suspension, Airtec snorkels, TJM Pro Lockers and TJM roof top tents & awnings.

While TJM has grown to be a sophisticated operation, we have never forgotten the key elements that resulted in the formation of the brand.

**Trust;** from the quality of manufacturing.

**Pride;** in our innovative designs.

**Adventure;** heading out from suburbia and experiencing the wonders of our unique and breathtaking country, Australia.

**TJM EQUIPPED**  
**ON AND OFF ROAD. WORK OR PLAY.**

TJM Outback bars employ either a four or five-fold channel/wing design. Folds are deliberately spaced across the channel for maximum strength and stylish looks. The upswept tapered wing provides excellent approach angle for accessibility.

Recessed fog lights come standard along with recessed polycarbonate indicator & park lights.

TJMs bull bar uprights feature a single piece of steel which extends from the upright down through the bumper channel to the chassis mount maximising strength. 40mm Cato Straps soften the edges and add to the aesthetics.

TJM bull bars provide secure, strong and stable mounting points to fit a large array of driving lights. The strength of the TJM product guards against excessive movement resulting in a vibrating beam pattern, bulb failure or light body fatigue.

TJMs channel designs allow maximum airflow to the vehicle's radiator. This vent as well as the viewing hole on the top of the channel also allows easy access to the vehicle's winch controls.

Vehicle mounted aerials are often essential when travelling in remote locations. TJM bull bars feature two heavy duty aerial tabs located behind the bars top cross tube.

TJMs mounting system is specifically engineered for each vehicle. The design spreads impact and winching loads evenly across the vehicle's chassis. The design ensures the bull bar is strong enough for extreme conditions and functions properly in impact events.

The engineered winch frame mount accommodates a variety of winches and does not interfere with the vehicle's air bag triggering system. The bar is designed and tested to endure the heavy stresses of winching.

Recovery jack points which allow a hi-lift jack to be mounted directly onto the bull bar. (Certain TJM bull bar models may not incorporate this feature).

Many TJM bull bars come as standard with an integrated underbody guard, additional Front, Sump & Transmission guards are also available separately.

*Certain TJM bull bar models may not incorporate all of the following features.*

## TJM Airtec snorkels

Snorkels are commonly the first accessory ever fitted to a four wheel drive. They allow for deep water crossings and hassle free air induction when immersed in dust. Air is cooler and cleaner at roof level than air travelling via the bonnet, which means greater fuel efficiency and less clogging of air filters. These are important factors, particularly when 4WDing on dry, dusty roads.

TJM Airtec snorkels are manufactured at the highest level. All products are made with leading Australian polymer materials that exceed the Australian Standard for UV stabilisation of UV8, with ratings at UV20-UV24. The colour pigmentation process doesn't cut any corners either, giving you an even, dense and bleed-free product.

Unlike other manufacturers, TJM individually engineer and design the snorkel to suit the natural shape of the vehicle. Although functionality is important, we want you to look good too!

Proudly Australian made and quality assured, you can have the confidence that a TJM Airtec snorkel will achieve peak performance each and every time.

### TJM XGS suspension

If wheels were your car's feet, then suspension would be the legs. Just as the strength, length and flexibility of your legs impact on the way in which you move and the way you connect to the ground, different types of suspension determine the functionality, safety and comfort of your vehicle on different terrain. Made up of several parts that work together like joints and bones, suspension affects absolutely every aspect of driving.

### TJM dual battery systems

Flat batteries are annoying enough when you're within reach of help, but when travelling to remote locations through Australia, the last thing you need is a flat battery. TJMs range of international award-winning battery management systems will help you avoid the inconvenience and possible dangers of running your battery down.

### TJM recovery equipment

Every situation is unique, and the right equipment and a well thought out plan are the key ingredients to successful vehicle recoveries. Designed by engineers and manufactured to the highest standards, TJM recovery equipment gets you out of trouble. Should you become bogged, stuck or immobile, TJM recovery gear becomes your backup plan to ensure you can continue your journey.

### TJM air compressors

TJM has a range of vehicle mounted and portable compressors to suit your needs, whether that be for inflating tyres or operating TJM Pro Lockers.

### TJM flares

Flares are essential when fitting wide wheels and tyres, to help protect paint-work from road grime, stones, sand and mud thrown up by the tyres. The TJM range of flares are available for most 4WD and commercial vehicles.

## **TJM underbody guards**

To protect the most vulnerable components underneath the vehicle TJM underbody guards are constructed from 3mm thick steel sheet and incorporates strategic folds for incredible strength. They are electro coated black for corrosion resistance of up to 500 hours. The advantages of electro coating is that it gets into all the nooks and crannies and is much more resilient to chipping when knocked around, unlike powder-coated varieties.

- › 3mm thick steel
- › Provides excellent underbody protection
- › Electro coated black for up to 500 hours of corrosion resistance
- › Press folded in strategic areas for absolute maximum strength
- › Front underbody, sump and transmission guards available
- › Drain access holes for sump and transmission where necessary

## TJM electric winches

A TJM winch is the essential risk management tool when venturing to remote locations and upping the stakes of your 4WD adventure. TJM's range of new generation winches now have even more power for increased line speed and faster recovery.

And there's a TJM winch that'll fit most 4WD vehicles.

There are 9,000lb, 9,500lb and 12,000lb sizes, all with new and improved functionality and strength. The larger two models now have tough synthetic rope as standard for easier handling and improved performance.

Tested to meet Australian and our own high standards, a TJM winch will provide the right amount of 'grunt' in any situation, thanks to the carefully engineered balance of power and speed. For those who enjoy a challenge, owning a TJM winch provides you with the freedom to visit more places. When you're off the beaten track, stuck and lacking traction, it's not always as simple as relying on a mate with traction to bale you out. Steep inclines and muddy conditions are problematic and adding a second vehicle to the dilemma doesn't help anybody. Using a TJM winch, with a wireless remote for added safety, is a much better way to successfully recover your vehicle.

Engineered and manufactured by TJM in our 100% owned factory, the TJM winch range is 100% supported by TJM.

You'll get unstuck faster and safer without ever having to rely on a mate.

## **We started it**

Founded on mateship in 1973, TJM is the Aussie pioneer of 4WD equipment.

## **We're tried and proven**

Australia's rugged, yet diverse landscape has provided the ideal testing ground. Whether your journey takes you on or off road, for work or play, TJM has the gear you can depend on.

## **We're tough, yet sophisticated**

Using the latest engineering and manufacturing technology, our products are exposed to stringent testing and thorough quality assurance procedures to guarantee our customers receive nothing but the best.

## **Everybody wants a piece of us**

Our research and development team brings leading-edge and performance-driven products. We're the experts not just on our home turf but also offshore, so it's not surprising TJM's Aussie innovations are exported around the globe.

TJM Products Pty Ltd has made every effort for the information contained within this brochure to be correct at the time of printing.
